

AI-Powered Enterprise Video Surveillance Platform — India-Built.

I IDENTIFY

Detect anomalies in real time across every camera, every site.

R REPORT

Notify the right person — alerts route by skill, workload, and proximity.

A ACT

Drive resolution through SLAs, escalation paths, and case management.

VMS

Enterprise video management, India-built.

- Multi-site live view, playback, recording
- Role-based admin · multi-tenant · password vault
- Mobile live view, playback, alerts

AI SENSE

From passive recording to active surveillance. 28 native AI analytics across 4 modules.

- 8 Object · 1 Behavior · 6 Perimeter · 13 AI Analytics
- PPE · Fire/Smoke · Weapon · ANPR · Crowd · Heatmap
- Edge + server inference · feedback-driven retraining

CHECK

Device-level health intelligence across your fleet.

- Network · camera · storage · AI server · NTP health
- Tamper, obstruction, video-quality degradation alerts
- Mobile fleet status + critical alert notifications

SHIELD

ICCC — One operations centre. Every camera. Every incident.

- Multi-source event ingestion (AI · sensor · manual)
- Skill / workload / proximity-based alert routing
- SLA timers · case management · mobile incident response
